Abstract. A brief review of the causes

File Type PDF

Chapter 8 The

of underweight in  
adolescence is  
presented to help the  
practitioner determine  
the cause of  
underweight in his  
patient. Poor nutrition  
is determined by  
several key  
observations: (1)  
history; (2) physical  
examination; (3)  
anthropometric meas-  
urements—height,
