Observation Report of Child
Example - UKEssays.com
Time sampling: The observer records the frequency of a behavior's occurrence over time. Involves observing specified behaviors of an individual or group,

Access PDF Child Observation Time Sample

and recording the presence or absence of this behavior during short intervals of uniform length. Behavior is specified, defined, and limited. Provides quantitative data or number of events. Advantages

Obs. Methods

Acces PDF Child Observation Time Sample

A good observation describes the interaction that is taking place between the child and either another child, an adult or an object. The description doesn't need to be long and cumbersome, but should paint a picture of the interaction that is occurring with that child.
