A user guide, also commonly called a technical communication document or manual, is intended to give assistance to people using a particular system. It is usually written by a technical writer, although user guides are written by programmers, product or project managers, or other technical staff, particularly in smaller companies. User guides are most commonly associated with electronic goods, computer hardware and software, although they can be written for any product. Most user guides contain

Manuals covering electronic and mechanical products, instructions on mixing or blending items, and instruction sets for software and computer items are all included. Having the manual for an item can mean the difference between that item being useful (and therefore not immediately junked) and being forgotten, or replaced with similar products.

The manual reflects the significant changes that have occurred in asset management over the last 20 years, supplementing the outfall and culvert design sections of the UK Design manual for roads and bridges (DMRB). Written by a team of specialists in hydrology, hydraulics, civil engineering and asset management and guided by a panel drawn from representative bodies of infrastructure operators and contractors, this manual is for use in all the nations of the UK and has sections relevant to ...
