Lymphoma is by and large the most common cancer that affects cats, although there are other types of feline cancers that can affect domestic cats. Lymphoma typically happens in older felines and most commonly occurs in the small intestines, says Dr. Theresa Arteaga, DVM, DACVIUM (Oncology), owner of Animal Cancer Center in Monterey, California.

~~Cancer in Cats: Symptoms, Types and Treatment~~

Feline cancer is not as common as canine cancer, but is often more aggressive and advanced when diagnosed. As a pet owner, you may be uncertain about how to move forward with treating your cat's cancer. Fortunately, advancements in veterinary oncology have led to vastly improved knowledge about feline cancer and how best to treat it.

~~How to Treat Feline Cancer: 13 Steps (with Pictures) – wikiHow~~

Veterinary oncology is a subspecialty of veterinary medicine that deals with cancer diagnosis and treatment in animals. Cancer is a major cause of death in pet animals. In one study, 45% of the dogs that reached 10 years of age or older died of cancer.

with the diagnostic approach to the feline cancer patient, including biopsy taking, staging procedures, diagnostic imaging options as well as practical cytology sessions.

Feline Oncology | ESAVS

Sadly, Sapphie contracted cancer and in March 2018, on veterinary advice, it was thought best to put her to sleep to avoid further suffering. She was much missed by staff and commuters alike, and a plaque to her memory has been placed at the station. Funds raised in a Go-fund-me campaign for possible vet's fees were used for this after her death, and the remainder was given to a charity that ...
