PL/SQL also. The following example shows the IS JSON and JSON_EXISTS conditions and the JSON_VALUE and JSON_QUERY functions used in PL/SQL.

JSON Support Enhancements in Oracle Database 12c Release 2 ...

Oracle Database 12c JSON capabilities

- JSON documents are stored using VARCHAR, CLOB and BLOB data types
- Query and update JSON documents using SQL and PL/SQL
- Optimize operations on JSON documents using indexing, in-memory and Exadata smart storage techniques
- Discover information about the structure and content of JSON documents

JSON Support Oracle Database 12c Release 2

JSON support was added to Oracle Database 12c starting with release Oracle Database 12.1.0.2.0. Querying JSON with Oracle Database 12c The challenges presented by JSON based persistence The rapid adoption of JSON and XML based persistence has lead to a massive increase in the volume of semi-structured data that organizations need to manage.

Querying JSON with Oracle Database 12c Release 2

Oracle Database supports JavaScript Object Notation (JSON) data natively with relational database features, including transactions, indexing, declarative querying, and views. This documentation covers the use of database languages and features to work with JSON data that is stored in Oracle Database. In particular, it covers how to use SQL and PL/SQL with JSON data.

JSON in Oracle Database

Oracle Database 12c Release 2 (12.2) includes new JSON object types to support the in-memory parsing, generation and update of JSON data directly from PL/SQL. JSON_ELEMENT_T : The supertype some of the other object types extend. You will not often use this type directly. You can cast a JSON_ELEMENT_T to a subtype using TREAT AS.

PL/SQL Object Types for JSON in Oracle Database 12c ...

Oracle Database supports JSON natively with relational database features, including transactions, indexing, declarative querying, and views. JSON data has often been stored in NoSQL databases such as Oracle NoSQL Database and Oracle Berkeley DB.

JSON in Oracle Database

JSON support in 12c - fetching array values Hi,I have a query on the JSON feature of 12c. I have the following JSON data

```
CREATE TABLE jsontry( id VARCHAR2(11), str CLOB, CONSTRAINT jsontry_PK PRIMARY KEY (id), CONSTRAINT jsontry_CHK CHECK (str IS JSON) ENABLE );
```

Insert into jsontry values ('1','{a:100,b:100}');

JSON support in 12c - fetching array values - Ask TOM - Oracle

Oracle Database fully supports schemaless application development using the JSON data model. This allows for a hybrid development approach: all of the schema flexibility and speedy application development of NoSQL document stores, combined with all of the enterprise-ready features in Oracle Database. Oracle Database stores, manages, and indexes JSON documents.

Oracle JSON Document Database

This feature adds support for storing, querying and indexing JavaScript Object Notation (JSON) data to Oracle Database and allows the database to enforce that JSON stored in the Oracle Database conforms to the JSON rules.

Oracle Database 12c Release 1 (12.1.0.2) New Features

As of JSON support, it is a new Oracle XML DB feature added in Oracle Database 12c Release 1. From this same release onward, Oracle XML DB is a mandatory component of the database. Oracle Database allows you to store JSON and XML content in relational tables, as well as in Oracle XML DB Repository as files – like in a regular file system.

Bringing Data Pieces Together with Oracle Database 12c

No, JSON support was introduced in Oracle database 12c release 2 (12.1.0.2)
