Man Monitoring Diagnose System Edc7 D08 D28 D by Darci ...  
Monitoring is the direct measurement of a pollutant and/or the indirect measurement of its effects with the aim of evaluating its levels and controlling its impact on man and environment. Marine monitoring programs are conducted by national or international agencies and include a strategy of sampling, a selection of measurements, and standardized methodologies. Current monitoring strategies integrate chemical analyses and biological tools to assess the effects on organisms, including ...
