An ornithologist carries

Access Free Mei Statistics 1

out a study of the numbers of eggs laid per pair by a species of rare birds in its annual breeding season. He concludes that it may be considered as a discrete random variable X with probability distribution given by. $P(X = 0) = 0.2$.
 $P(X = r) =$ for $r = 1, 2, 3, 4$.
 $P(X = r) = 0$ otherwise.
