TextBook Oxidation Reduction Potentials In Bacteriology ...

Oxidation-reduction potential (Eh) is a measure of the ability of chemical/biochemical systems to oxidize (lose electrons) or reduce (gain electrons). A positive value indicates an oxidized state, whereas a negative value indicates a reduced state. The Eh of milk is about +150 mV and that of cheese is about -250 mV.

Oxidation Reduction Potential - an overview ...

The formalism of oxidation?reduction reactions and calculations of redox potentials are a traditional part of teaching bioenergetics. By quantitating the tendencies of redox reactions to occur, several ideas in metabolism can be reinforced.
