The latest release "Selenium 2.0" is integrated with WebDriver API which provides a simpler and more concise programming interface. The following image will give you a fair understanding of Selenium components and the Test Automation Tools.

Selenium WebDriver Tutorial - javatpoint

Selenium is an open-source tool that automates web browsers. It provides a single interface that lets you write test scripts in programming languages like Ruby, Java, NodeJS, PHP, Perl, Python, and C#, among others. A browser-driver then executes these scripts on a browser-instance on your device (more on this in a moment).
