Kallie Szczepanski. Updated October 17, 2019. Paper money is an invention of the Song Dynasty in China in the 11th century CE, nearly 20 centuries after the earliest known use of metal coins. While paper money was certainly easier to carry in large amounts, using paper money had its risks: counterfeiting and inflation.

Napoleon issued paper banknotes in the early 1800s. Cash paper money originated as receipts for value held on account "value received", and should not be conflated with promissory "sight bills" which were issued with a promise to convert at a later date. The perception of banknotes as money has evolved over time.

This paper draws lessons from the Bank of Amsterdam for the governance of money. The early operational framework of the Bank of Amsterdam resembled a "stablecoin" - where account-based money is backed by assets of stable value and where the money stock is managed passively by the inflows and outflows of assets.
